

Greek Grammar I

Chapter 8 Homework Drill

Actually, I'm assigning this to be done in conjunction with Chapter 8 homework, but it's a review of case endings from Chs. 6-7 (since BBGW does not include exercises on this).

For the following Greek nouns, identify: the declension pattern, the case, number, gender, and lexical form. [I've given you the first one as an example. Note: once you've figured out the declension and lexical form for a noun, you don't have to write it over and over. Just use ditto marks or draw a downward arrow.]
